

The ISI Family: Accomplishments, Opportunities, and Challenges

Vijay Nair*
President, ISI

University of Michigan, Ann Arbor, USA – vnn@umich.edu

The activities of the ISI family cover an exceptionally broad range of areas and include almost all aspects of statistics. In this session, the outgoing Presidents of the ISI and the Associations will present their perspectives on recent accomplishments, emerging opportunities, and challenges ahead. The discussion is spread over two parts (or two sessions). Part I will cover the ISI, IAOS, IASS, and IASE. Part II will cover the ISI, Bernoulli Society, IASC, and ISBIS. There will be 15-20 minute presentations by the Presidents followed by a brief panel discussion and then questions and answers from the floor.

Keywords: Big data; mode effects; official statistics; web-panels.
